Kardinaliteit

Filter flow

- Filter richting wordt aangeduid met een pijl op de relatie.
- Standaard gaat deze van de 1-kant van de relatie naar de veel-kant.
- Wanneer je een tabel filtert, gaat deze info enkel 'downstream' (volgens de richting van de pijl).
- Dit kan nooit 'upstream'. (tegen de richting van de pijl in)

Cross filter

Cross filter

Cross filter

! You can't create a direct active relationship between **Sales_Data** and **Product_Lookup** because that would introduce ambiguity between tables **Product_Lookup** and **Territory_Lookup**. To make this relationship active, deactivate or delete one of the relationships between **Product_Lookup** and **Territory_Lookup** first.
